BullsEye™

DIGITAL FIRE EXTINGUISHER TRAINING SYSTEM

Train Anyone. Train Anywhere.

This fully digital system features a laser extinguisher and LED flames to simulate real fires and reinforce proper techniques.

BullsEye lets you train more people, more often, in the places where fires are most likely to occur. It's available in two sizes: The original model and BullsEye Go, which comes with a scaled-down LED panel that weighs just 19 pounds—perfect for one person to transport and set up.

Bring Training Indoors

Train in offices, schools, hospitals, manufacturing facilities and other real-world environments.

Build Muscle Memory

Practice with a digital extinguisher that has a pin, handle and hose to accurately mimic a real extinguisher.

Train Quickly, Cleanly

Plug in the system and start training in minutes. And because it's fully digital, there's no cleanup afterward.

Reduce Costs

Avoid recurring training expenses like fuel and new extinguishers, which helps you stay on budget.

"We purchased the BullsEye system a few months ago and thoroughly believe it is one of the best investments for safety education that our company has made."

Dylan Hayes
Disaster Response Manager,
Seattle Children's Hospital

BullsEye™ Digital Fire Extinguisher Training System

Taking It to the Next Level

BullsEye connects wirelessly with other LION products to create immersive scenarios.

RELATED PRODUCTS

R.A.C.E. Station

Short for Rescue, Alert, Confine and Extinguish, this portable system features a phone, pull stations, strobe lights and alarms.

SG1000™ Smoke Generator

Our cordless generator heats up instantly to produce safe, water-based smoke. The bigger the fire, the more smoke it creates.

Tablet and software

Instructors can adjust difficulty levels, track trainee performance over time and set up custom—and repeatable—training sessions.
